

Project Quotation

Scope of Work:

Development of a responsive website with admin panel (CMS), blog update, SEO optimization, and complete setup.

Inclusions

1. Professional, Accessible & Responsive Design

- Clean, modern UI/UX design reflecting the serious and trustworthy nature of a legal and research organization.
- Fully **mobile-first responsive design**, compatible with all devices and screen sizes.
- Full compliance with **WCAG 2.1 Level AA** accessibility standards to ensure usability for all individuals, including those with disabilities.

2. Core Pages & Site Architecture

- Logical and intuitive **navigation structure** for seamless user experience.
- Implementation of the following key pages:
 - **Home:** Dynamic, engaging landing page with service overview and CTAs.
 - **About Us:** Detailed mission, vision, and organizational background.
 - **Our Team:** Professional profiles with images, bios, and expertise.
 - **Services:** Organized service listings with relevant descriptions.
 - **Research & Publications:** Uploadable section for papers, articles, and reports.
 - **Blog / News & Updates:** Easily manageable posts with categories/tags.
 - **Contact Us:** Embedded Google Map, contact details, and secure contact form.

3. Content Management System (CMS)

- Website built on **WordPress CMS** with a custom theme tailored to brand identity.
- Admin panel access with **user-friendly dashboard** for content editing.
- Role-based permissions for secure content management by client's staff.

4. Functionality & SEO Optimization

- **SEO-optimized** structure including:
 - Clean URLs
 - Meta titles/descriptions
 - Fast load times
 - Schema markup integration
- **Secure contact form** with spam protection (Google reCAPTCHA v3 or hCaptcha).
- Easy document upload and categorization system for publications.
- Blog and news system with tagging and commenting capability (optional).

5. Security & Performance

- SSL implementation and **HTTPS protocol** enforced.
- Strong security configuration with **firewall rules, brute-force protection, and anti-spam** features.
- Regular backups (optional, if hosting is managed).
- Optimization for **page speed** and performance using caching and lazy-loading.

6. Training, Handover & Support

- Delivery of full **source code, assets, and WordPress theme files**.
- Brief **CMS training session** or video documentation for staff on how to update content and manage posts/pages.
- 1-year **post-launch technical support** for minor adjustments and bug fixes.

Optimization

- SEO Optimization (Meta tags, image alt text, URL structure)

Support

- 24/7 technical support for 1 year
- Bug fixes
- Hosting/email issues
- Uptime monitoring assistance
